This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. Warrantees of Land

IN THE

SEVERAL COUNTIES

OF THE

STATE OF PENNSYLVANIA.

1730-1898.

EDITED BY

VOL. I.

WM. STANLEY RAY,
STATE PRINTER OF PENNSYLVANIA.
1898.

PREFATORY NOTE.

The lists of warrantees of land in the several counties of the Commonwealth are copied from the original record books in the Land Office of the Department of Internal Affairs. Only the names of the warrantees with number of acres and dates of warrant are given. They will serve however as a valuable guide to all desiring information from that Department. The orthography of the surnames has not been changed, a literal copy being made with all the errors. Individuals must make the corrections for themselves. It is the duty of the faithful archivist to follow the originals in all cases. It will be seen that the dates of warrants begin with the opening of the Land Office at the time when William Penn's children arrived at maturity. For a guide in the location of land warrants the Editor appends the organization of counties and those from which formed. This is necessary. For instance it may be stated that Lebanon county was formed in 1813, from a portion of Dauphin, and that Dauphin was formed from a part of Lancaster in 1785; and Lancaster was formed in 1729, from a part of Chester. As these warrants are dated after 1730, prior to 1785, those relating to Dauphin will be found arranged in Lancaster county. For Lebanon, prior to 1785, the record will be found under Lancaster county, and from 1785 to 1813, under Dauphin county. It is necessary, therefore, to observe these points in making any investigation whatsoever. It may be here noted, in conclusion, especially in this volume that prior to the lists of Cumberland county a typographical error may be observed in many instances where a comma is used between the figures instead of a period. For instance, 114 with a comma after and then 64 (114,64), does not mean 114 acres, and also 64 acres, but it means 114 acres and 64 one-hundredths (114.64 acres). The period should supplant the comma.
